For data-driven decision making:

Quantify risk
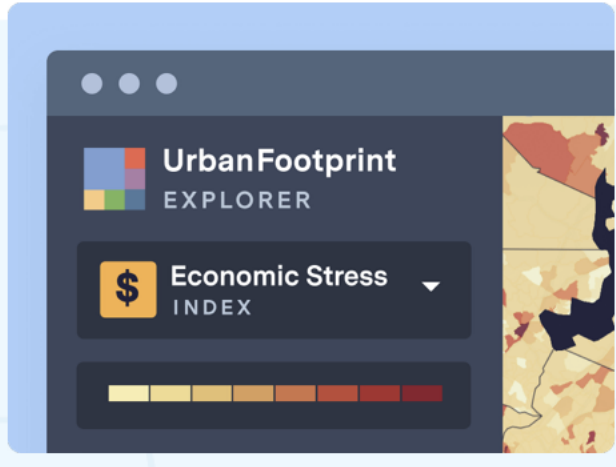

Optimize interventions

**Prioritize investments**

Fine-tune policy

Intuitive interface, accessible insights

From any web browser, access easy-to-use, interactive maps and visually rich dashboards to make quick, informed decisions.

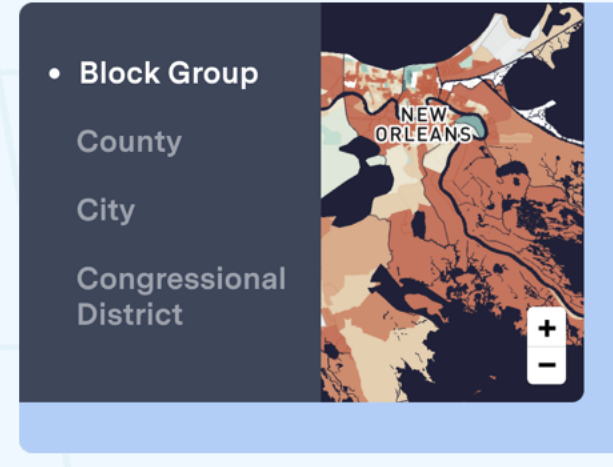

Access from any web browser

Quickly track data trends over time

Gather insights from easy-to-read charts

View data at any scale

Risk & Resilience Assessment

Map, compare, and quantify risk

→ Compare community resilience and climate risk for any asset or area.

→ Visualize at-risk infrastructure, investment sites, property, or population in a geographical area.

→ Identify communities impacted by social vulnerability, economic stress, health risks, and more.

Assess environmental resilience

Map at-risk infrastructure

Target vulnerable communities

Locate EV charging sites in low-access communities

Find vaccine distribution sites near public transit

Identify food distribution sites in high-risk areas

Tactical Planning

Optimize interventions and site selection

→ Prioritize infrastructure investments to bolster community resilience and lower natural hazard risk.

→ Assess existing plans and programs through the lens of community resilience and climate risk.

→ Analyze downstream impacts of resource allocations under different health, social, and economic recovery scenarios.
